8100 emulating yaoqi emu gemstech realtek c100 are all well supported and it's really up to you. I tend to do it all in windows, it is just easier to work with its lower end machines as my medium ones are windows 8 and higher. There is plenty of research out there on the subject and I always try to do as much research as possible on the forums or google before I do anything, it will save you a lot of grief! Search this blog About Me Hi, my name is Julian but I'm more commonly known as Longshanks in my home. I am 30 years old and live in the beautiful city of Worcester, have a wonderful girlfriend and a new house which I am in the process of renovating Q: Programmatically add a visual element (text/image) to the UIActivityIndicatorView I am trying to create a custom view that sits on top of the UIActivityIndicatorView, so that when the user chooses to share, the "share" button is replaced with a custom view. What I've been able to get to work so far is to add a view to the UIActivityIndicatorView, but this doesn't seem to be what I want, since I don't want the share button to be disabled. I also need to be able to change the visual appearance of the custom view, specifically the text and image of the "Share" button. Here's my code so far: - (void)addCustomView { // Create a visual element UIView *customView = [[UIView alloc] initWithFrame:CGRectMake(10, 10, 100, 100)]; // Add it to the UIActivityIndicatorView UIActivityIndicatorView *activityController = [[UIActivityIndicatorView alloc] initWithActivityIndicator:@"Do you like my shirt?"] applicationActivities:nil]; activityController.excludedActivityTypes = @[UIActivityTypePostToFacebook, UIActivityTypeEmail, UIActivityTypeMessage]; 82157476af
